PROJECTS

1. VEHICLE SERVICE MANAGEMENT SYSTEM.

- Developed a Vehicle Service Management System (VSMS) using HTML, CSS, JavaScript, PHP, and MySQL.
- Enabled users to book vehicle services online easily. Added features to track service status and view service history in real-time.
- Implemented an invoice generation module and online payment integration for seamless transactions.
- Built an admin dashboard for managing bookings, payments, and user details efficiently.
- Automated email/SMS notifications for booking confirmations and status updates.
- Handled 10+ real service bookings, improving operational efficiency.
- Made the workflow faster and more organized compared to traditional service centers. ([Try it here](#))
